

Test Name: KGiSL Hexaware Aptitude 3

Test Code: KGIS00114

Description:

Welcome to the test. This test consists of 2 sections: Quantitative Aptitude and Logical Reasoning. Please read the instructions for each section carefully before starting.

Section Summary

Section	No. of Questions	Marks (+ / -)
Quantitative Aptitude	20	+1 / -0
Logical Reasoning	20	+1 / -0

Preplista
An Adda Education Company

Quantitative Aptitude Section

Duration: 30 minutes

Questions: 20

Marks per Question: +1 for correct, -0 for incorrect

1

A sum of money is divided among four people, Arun, Balu, Cheran, and Dinesh, such that Arun receives $\frac{2}{3}$ of what Balu gets, Balu receives $\frac{3}{4}$ of what Cheran gets, and Dinesh receives half of the sum of Balu and Cheran. If the difference between Arun's and Cheran's shares is ₹8,000, what is D's share?

A. 10000

B. 12000

C. 14000

D. 16000

Correct Answer:

C. 14000

Explanation:

Explanation:

$$A's \text{ share} = \frac{2}{3} \times \frac{3}{4} \times C = \frac{1}{2}C$$

$$B's \text{ share} = \frac{3}{4}C$$

$$C's \text{ share} = C$$

the difference between A's and C's shares is ₹8,000

$$C - A = C - \frac{1}{2}C = 8000$$

$$0.5C = 8000$$

$$C = 16000$$

$$B = \frac{3}{4} \times 16000 = 12000$$

$$D = \frac{(16000+12000)}{2} = 14000$$

Marks: +1 for correct answer, -0 for wrong answer

Preplnsta
An Adda Education Company

A dishonest milkman professes to sell milk at cost price but mixes water with it and thereby gains 25%. What is the percentage of water in the mixture that he sells?

A. 20%

B. 25%

C. 30%

D. 33.33%

Correct Answer:

A. 20%

Explanation:

Let CP = 100.

With a 25% gain, SP = 125.

But SP = actual milk cost.

If the mixture contains $(100-x)\%$ milk and $x\%$ water:

Cost of milk in mixture = 100.

Selling at CP means: $(100-x) = \frac{100}{1.25} = 80$

So $x = 20\%$.

Marks: +1 for correct answer, -0 for wrong answer

In the given bar graph, what is the ratio of the total boys and girls in all schools?

A. 65 : 63

B. 59 : 66

C. 65 : 58

D. 66 : 59

Correct Answer:

D. 66 : 59

Explanation:

Sol.

Boys Grils

3300 : 2950

66 : 59

Marks: +1 for correct answer, -0 for wrong answer

An equilateral triangle has the same perimeter as a square. If the area of the triangle is $64\sqrt{3} \text{ cm}^2$. find the area of the square.

A. 256 cm^2

B. 144 cm^2

C. $196\sqrt{3} \text{ cm}^2$

D. 169 cm^2

Correct Answer:

B. 144 cm^2

Explanation:

$$\text{Area of equilateral triangle} = \frac{\sqrt{3}}{4} \times a^2$$

$$64\sqrt{3} = \frac{\sqrt{3}}{4} \times a^2$$

$$a^2 = 256$$

$$a = 16$$

$$\text{Perimeter of triangle} = 3a = 3 \times 16 = 48$$

$$\text{Perimeter of square} = 4a$$

$$\text{Perimeter of a triangle} = \text{perimeter of square}$$

$$48 = 4a$$

$$a = 12$$

$$\text{The area of the square is } a^2 = 12^2 = 144$$

Marks: +1 for correct answer, -0 for wrong answer

A rhombus has diagonals of lengths 16 cm and 12 cm. A circle is inscribed in this rhombus. Find the radius of the inscribed circle.

A. 4.8 cm

B. 4.5 cm

C. 5 cm

D. 4 cm

Correct Answer:

A. 4.8 cm

Explanation:

$$\text{Area of rhombus} = \frac{1}{2} \times 16 \times 12 = 96 \text{ cm}^2$$

$$\text{Side of rhombus} = \sqrt{(8^2 + 6^2)} = 10 \text{ cm}$$

$$\text{Perimeter} = 40 \text{ cm.}$$

$$\text{Semi-Perimeter} = 20 \text{ cm}$$

$$\text{Inradius} = \frac{\text{Area}}{\text{semi-perimeter}} = \frac{96}{20} = 4.8 \text{ cm}$$

Marks: +1 for correct answer, -0 for wrong answer

The ratio of present ages of P, Q, and R is 4 : 5 : 9. After 8 years, the ratio of Q's age to the average of P's and R's ages will be 1 : 2. What is R's present age?

A. 86

B. 60

C. 54

D. 72

Correct Answer:

D. 72

Explanation:

Let the present ages of the three persons be $4x$, $5x$, $9x$

After 8 years, their ages will be $4x + 8$, $5x + 8$, $9x + 8$

$$\text{Given: } \frac{\frac{5x+8}{(4x+8)+(9x+8)}}{2} = \frac{1}{2}$$

$$\frac{\frac{5x+8}{13x+16}}{2} = \frac{1}{2}$$

$$2(5x + 8) = \frac{13x+16}{2}$$

$$20x + 32 = 13x + 16$$

$$7x = 56$$

$$x = 8$$

$$\text{Present age of } R = 9x = 9 \times 8 = 72$$

Marks: +1 for correct answer, -0 for wrong answer

The average score of a student in 7 subjects is 78. If the average in the first 5 subjects is 80, what is the average in the remaining two subjects?

A. 70

B. 73

C. 75

D. 72

Correct Answer:

B. 73

Explanation:

$$= \frac{(7 \times 78) - (5 \times 80)}{2} = 73$$

Marks: +1 for correct answer, -0 for wrong answer

Rohan buys an old Yamaha bike and spends ₹2,000 on repairing it. After fixing it, he sells the bike to Amit at a 25% profit. Later, Amit sells it to Neeraj at a 10% loss. Finally, Neeraj sells the bike for ₹16,200, making a 20% profit. How much did Rohan originally pay for the bike before spending on repairs?

A. Rs. 9600

B. Rs. 10800

C. Rs. 9685

D. Rs. 10000

Correct Answer:

D. Rs. 10000

Preplista
An Adda Education Company

Explanation:

Neeraj sells the bike for ₹16,200, making a 20% profit

$$\text{Neeraj's cost price of the bike} = \frac{16200}{1.2} = 13500$$

Neeraj's cost price = Amit's selling price

Amit sells it to Neeraj at a 10% loss

Amit's selling price = 13500

$$\text{Amit's cost price} = \frac{13500}{0.9} = 15000$$

Amit's cost price = Rohan's selling price

Rohan's selling price = 15000

$$\text{Rohan's cost price} = \frac{15000}{1.25} = 12000$$

The actual cost of the bike is x.

$$\text{Rohan's cost price} = x + 2000 = 12000$$

$$x = 12000 - 2000 = 10000$$

Marks: +1 for correct answer, -0 for wrong answer

What is the value of 0.15% of $33\frac{1}{3}\%$ of 10000?

A. 5

B. 150

C. 0.05

D. 105

Correct Answer:

A. 5

Explanation:

$$\text{Value} = 0.15 \times 33\frac{1}{3} \times 10000$$

$$= \frac{0.15}{100} \times \frac{100}{3} \times 10000$$

$$= \frac{15}{10000} \times \frac{1}{3} \times 10000 = 5$$

Marks: +1 for correct answer, -0 for wrong answer

A milkman has three containers: Container A has milk with 15% water, Container B has milk with 25% water, and Container C has pure milk. He mixes liquids from A and B in the ratio 3:2 to create 60 liters of mixture. Then he removes 24 liters from this mixture and replaces it with liquid from Container C. Find the quantity of water present in the final mixture.

A. 16.7

B. 6.84

C. 10.84

D. 4.86

Correct Answer:

B. 6.84

Preplista
An Adda Education Company

Explanation:

Container A with 15% water and remaining Milk

Container B with 25% water and remaining Milk

Container C with 100% Milk

The New mixture 60 L is created with A and B in the ratio of 3:2

$$\text{Water quantity in new mixture of 60 L} = 36 \times \frac{15}{100} + 24 \times \frac{25}{100} = 11.4 \text{ L}$$

Now, 24 L from the new mixture is removed and replaced with 24 L.

$$\text{The quantity of water removed from the mixture is } \frac{24}{60} \times 11.4 = 4.56 \text{ L}$$

$$\text{The quantity of water present in the final solution} = 11.4 - 4.56 = 6.84 \text{ L}$$

Marks: +1 for correct answer, -0 for wrong answer

A man can row 40 km upstream in 8 hours and the same distance downstream in 5 hours. Find the speed of the man in still water and the rate of the stream.

A. 6.5 km/h, 1.5 km/h

B. 7 km/h, 2 km/h

C. 5.5 km/h, 2.5 km/h

D. 6 km/h, 1 km/h

Correct Answer:

A. 6.5 km/h, 1.5 km/h

Explanation:

$$\text{Upstream speed} = \frac{40}{8} = 5 \text{ km/h}$$

$$\text{Downstream speed} = \frac{40}{5} = 8 \text{ km/h}$$

$$\text{Boat speed} = \frac{(8+5)}{2} = 6.5 \text{ km/h}$$

$$\text{Stream speed} = \frac{(8-5)}{2} = 1.5 \text{ km/h.}$$

Marks: +1 for correct answer, -0 for wrong answer

A boat takes 90 minutes less to travel 36 km downstream than to travel the same distance upstream. If the speed of the boat in still water is 10 km/h, find the speed of the stream.

A. 2 km/h

B. 2.5 km/h

C. 3 km/h

D. 3.5 km/h

Correct Answer:

A. 2 km/h

Explanation:

Let stream speed = s .

$$\frac{36}{(10+s)} - \frac{36}{(10-s)} = 1.5$$

$$36[(10-s) - (10+s)] = 1.5(100-s^2)$$

$$-72s = 150 - 1.5s^2$$

$$1.5s^2 - 72s - 150 = 0$$

$$s^2 - 48s - 100 = 0$$

$$(s+50)(s-2) = 0$$

$$s = 2 \text{ km/h}$$

Marks: +1 for correct answer, -0 for wrong answer

Ankita and Bhavna together can complete a data-cleaning project in 8 days. Ankita works alone for 4 days and completes 25% of the work. After that, both work together for 3 days and complete another 37.5% of the project. In how many days can Bhavna alone complete the entire project?

A. 12 days

B. 16 days

C. 18 days

D. 20 days

Correct Answer:

B. 16 days

Explanation:

Assume total work as 1.

Together, Ankita and Bhavna can complete a data-cleaning project in 8 days

$$A + B = \frac{1}{8}$$

Ankita works alone for 4 days and completes 25% of the work

$$\text{Ankita's one-day work} = \frac{\left(\frac{1}{4}\right)}{4} = \frac{1}{16}$$

Both work together for 3 days and complete another 37.5% of the project

$$3(A + B) = 37.5\% = \frac{3}{8}$$

$$A + B = \frac{1}{8}$$

$$\frac{1}{16} + B = \frac{1}{8}$$

$$B = \frac{1}{8} - \frac{1}{16} = \frac{1}{16}$$

Bhavna takes 16 days to complete the project alone.

Marks: +1 for correct answer, -0 for wrong answer

Ajay and Devika are assigned to complete a software module. Ajay works alone for 4 days and completes 25% of the work. Devika then joins him, and together they complete the remaining work in 5 days. If Devika alone can complete the entire module 6 days faster than Ajay alone, find the number of days Devika would take to complete the work alone.

A. 9 days

B. 10 days

C. 12 days

D. 15 days

Correct Answer:

B. 10 days

Preplista
An Adda Education Company

Explanation:

Ajay works alone for 4 days and completes 25% of the work.

Then Ajay and Devika together finish the remaining work in 5 days.

Devika alone can complete the entire module 6 days faster than Ajay alone.

Let's assume total work as 100.

Ajay take 4 days to complete 25% of the work

$$\text{Ajay's work per day} = \frac{25}{4}$$

$$\text{Ajay alone to complete the work} = \frac{100}{\left(\frac{25}{4}\right)} = 16 \text{ days}$$

Devika alone can complete the entire module 6 days faster than Ajay alone.

$$\text{Devika's work per day} = 16 - 6 = 10 \text{ days}$$

Marks: +1 for correct answer, -0 for wrong answer

Preplista
An Adda Education Company

How many 4-letter words can be formed using the letters of the word "LOGIC" (without repetition), where each word must start with a vowel?

A. 12

B. 24

C. 36

D. 48

Correct Answer:

D. 48

Explanation:

Vowels are O and I.

For the first letter we have two choices.

For the remaining 3 letters, ${}^4P_3 = \frac{4!}{(4-3)!} = 4 \times 3 \times 2$

Totals ways = $2 \times 4 \times 3 \times 2 = 48$

Marks: +1 for correct answer, -0 for wrong answer

In how many ways can 3 boys and 4 girls be seated on a bench if no two boys are allowed to sit next to each other?

A. 720

B. 2880

C. 1440

D. 4320

Correct Answer:

C. 1440

Explanation:

Arrange the 4 girls first in alternate places = $4! = 24$

__ G __ G __ G __ G __

This creates 5 gaps, including ends, where 3 boys can be placed.

Number of ways to choose 3 places out of 5 places = ${}^5C_3 = \frac{5!}{3!(5-3)!} = 10$

The numbers of ways boys can be arranged is $3! = 6$

Total arrangements = $24 * 10 * 6 = 1440$

Marks: +1 for correct answer, -0 for wrong answer

In a row, 4 boys and 3 girls are seated at random. What is the probability that all 3 girls sit together?

A. $\frac{1}{7}$

B. $\frac{1}{14}$

C. $\frac{1}{35}$

D. $\frac{6}{35}$

Correct Answer:

A. $\frac{1}{7}$

Explanation:

Total number of ways to arrange 7 people (4 boys and 3 girls) in a row = $7!$

Total ways = $7 \times 6 \times 5 \times 4 \times 3 \times 2 \times 1 = 5040$.

To find the number of ways where all 3 girls sit together, we treat the group of 3 girls as a single unit.

Now we have 4 boys and 1 unit (of girls), making it 5 units to arrange.

Number of ways to arrange these 5 units = $5!$

Within the girls' unit, the 3 girls can be arranged among themselves in $3!$ ways.

Number of favorable ways = $5! \times 3!$

Favorable ways = $(120) \times (6) = 720$.

Probability = Favorable ways / Total ways

$$\text{Probability} = \frac{720}{5040}$$

$$\text{Probability} = \frac{72}{504} = \frac{1}{7}$$

Marks: +1 for correct answer, -0 for wrong answer

Bag A contains 3 red and 2 blue balls, while Bag B contains 2 red and 4 blue balls. One ball is transferred at random from Bag A to Bag B, and then a ball is drawn at random from Bag B. What is the probability that the ball drawn from Bag B is red?

A. $\frac{13}{35}$

B. $\frac{11}{35}$

C. $\frac{15}{42}$

D. $\frac{2}{7}$

Correct Answer:

A. $\frac{13}{35}$

Preplnsta
An Adda Education Company

Explanation:

Case 1: A red ball is transferred from Bag A to Bag B.

Probability of transferring a red ball = $\frac{3}{5}$

Now Bag B has 3 red and 4 blue balls (Total = 7).

Probability of drawing a red ball from Bag B = $\frac{3}{7}$

Combined probability for Case 1 = $\frac{3}{5} \times \frac{3}{7} = \frac{9}{35}$

Case 2: A blue ball is transferred from Bag A to Bag B.

Probability of transferring a blue ball = $\frac{2}{5}$

Now Bag B has 2 red and 5 blue balls (Total = 7).

Probability of drawing a red ball from Bag B = $\frac{2}{7}$

Combined probability for Case 2 = $\frac{2}{5} \times \frac{2}{7} = \frac{4}{35}$

Total probability = Probability(Case 1) + Probability(Case 2)

Total probability = $\frac{9}{35} + \frac{4}{35} = \frac{13}{35}$

Marks: +1 for correct answer, -0 for wrong answer

The given pie chart depicts the percentage of students coming to school using different modes of transport Total number of students=1300

In the given pie-chart, if 234 students used to walk, then how many come by bus?

A. 286

B. 432

C. 273

D. 507

Correct Answer:

D. 507

Explanation:

Sol.

Number of total students = 1300

Number of students come by bus = $\frac{1300 \times 39}{100} = 507$

Marks: +1 for correct answer, -0 for wrong answer

A sum of Rs. 13,440 was distributed in two parts. The first part given on loan at 4% per annum for three years while the second part at 6% for 5 years. If interests accrued on both the parts were equal, then what was the difference between the parts?

A. Rs. 3840

B. Rs. 3640

C. Rs. 9600

D. Rs. 5760

Correct Answer:

D. Rs. 5760

Explanation:

Sol.

$$\frac{p_1 r_1 t_1}{100} = \frac{p_2 r_2 t_2}{100}$$

$$\frac{p_1}{p_2} = \frac{r_2 t_2}{r_1 t_1} = \frac{6 \times 5}{3 \times 4} = \frac{5}{2}$$

$$\text{I part} = \frac{5}{2+5} \times 13440 = 3840$$

$$\text{So difference} = 9600 - 3840 = 5760$$

Marks: +1 for correct answer, -0 for wrong answer

Logical Reasoning Section

Duration: 30 minutes

Questions: 20

Marks per Question: +1 for correct, -0 for incorrect

1

Find out the missing term:

2, 4, 8, 16, ?

A. 32

B. 48

C. 24

D. none of these

Correct Answer:

A. 32

Explanation:

Multiply each term by 2

$$16 \times 2 = 32$$

Marks: +1 for correct answer, -0 for wrong answer

Which of the following numbers will replace the question mark (?) in the given series?

12, 26, 54, ?, 222, 446

A. 98

B. 94

C. 88

D. 110

Correct Answer:

D. 110

Explanation:

Given:

12, 26, 54, ?, 222, 446

Logic: Pattern in the series is double of the previous number + 2

$$12 \times 2 + 2 = 24 + 2 = 26$$

$$26 \times 2 + 2 = 52 + 2 = 54$$

$$54 \times 2 + 2 = 108 + 2 = 110$$

$$110 \times 2 + 2 = 220 + 2 = 222$$

$$222 \times 2 + 2 = 444 + 2 = 446$$

Final Answer: 110

Marks: +1 for correct answer, -0 for wrong answer

Instructions:

Determine which conclusions follow logically from the given decision.

Statement:

The company has restricted official email usage to internal communication only.

Conclusions:

- I. Employees are no longer allowed to use official email for personal matters.
- II. Official emails can no longer be used to communicate with clients.
- III. The company wants to reduce external risks.
- IV. Employees will use personal emails for external contacts.

A. I and II follow

B. Only I follows

C. Only II follows

D. III and IV follow

Correct Answer:

A. I and II follow

Explanation:

The restriction applies to internal communication only, meaning employees can't use official emails for personal or external use. This supports conclusions I and II. However, conclusions III and IV are assumptions about the reason and what employees will do instead. Only I and II are strictly supported.

Marks: +1 for correct answer, -0 for wrong answer

4

Statements: $K > L = M \geq N < O \leq P$

Conclusions:

I. $K > N$

II. $M < P$

A. Only I is true

B. Only II is true

C. Both I and II are true

D. Neither I nor II is true

Correct Answer:

A. Only I is true

Explanation:

$K > L = M \geq N$, so $K > N$ (I true).

For II: $M \geq N < O \leq P$ doesn't establish relationship between M and P (II false).

Marks: +1 for correct answer, -0 for wrong answer

Statement: The recently announced vehicle scrappage scheme is likely to usher in significant change in the Indian automobile industry and is expected to generate demand for new vehicles, especially commercial vehicles.

Conclusions:

- I) The scrappage policy could change India's automobile sector
- II) Scrapyards are likely to be established in the four zones

A. None can be concluded

B. Only I can be concluded

C. Either I or II can be concluded

D. Both I and II can be concluded

Correct Answer:

B. Only I can be concluded

Explanation:

Explanation: The statement clearly mentions that the scrappage policy will bring significant change in the automobile sector, so Conclusion I follows. There is no mention of scrapyards or their locations, so Conclusion II does not follow. Hence, the answer is Only I can be concluded.

Marks: +1 for correct answer, -0 for wrong answer

In the following question below are given some statements followed by some conclusions based on those statements. Taking the given statements to be true even if they seem to be at variance from commonly known facts. Read all the conclusions and then decide which of the given conclusion logically follows the given statements.

Statements:

I. All P are W.

II. No O is W.

Conclusion:

I. Some O are not P.

II. All W are O.

A. Neither conclusion follows

B. Only conclusion I follows

C. Only conclusion II follows

D. Both conclusions I and II follows

Correct Answer:

B. Only conclusion I follows

Explanation:

As → only 1st follow

Marks: +1 for correct answer, -0 for wrong answer

Preplnsta
An Adda Education Company

Read the given statements and conclusions carefully. Assuming that the information given in the statements is true, even if it appears to be at variance with commonly known facts, decide which of the given conclusions logically follow(s) from the statements.

Statement I: All unions are intersections.

Statement II: All intersections are negations.

Conclusion I: Some negations are intersections.

Conclusion II: No union is a negation.

A. Neither I nor II follows

B. Both I and II follows

C. Only I follows

D. Only II follows

Correct Answer:

C. Only I follows

Explanation:

(I) Right

II) Wrong

Only 1st follow

Marks: +1 for correct answer, -0 for wrong answer

Preplnsta
An Adda Education Company

In the given problem, a question is followed by two statements numbered I and II. You have to decide whether the data provided in the statement is sufficient to answer the question, and then give your answer accordingly.

Village R is in which direction with respect to village D ?

(I) Village R is to the north of village T and is to the west of village F.

(II) Village D is to the west of village T ?

- A. Only I is sufficient.
- B. Only II is sufficient.
- C. Both I and II are required
- D. Both I and II are not sufficient

Correct Answer:

C. Both I and II are required

Explanation:

Statement (I) alone is not sufficient as D is not mentioned in statement I.

Statement (II) alone is also not sufficient as R is not mentioned in statement II.

From I and II, we get the adjoining arrangement as shown :

Clearly, village R is to the north-east of village D.

Marks: +1 for correct answer, -0 for wrong answer

In the given problem, a question is followed by two statements numbered I and II. You have to decide whether the data provided in the statement is sufficient to answer the question, and then give your answer accordingly.

What does '\$' mean in a code language ?

I. 5\$#3' means 'flowers are really good'.

II. '7#35' means 'good flowers are available'.

- A. If the data in statement I alone are sufficient to answer the question, while the data in statement II alone are not sufficient to answer the question.
- B. If the data in statement II alone are sufficient to answer the question, while the data in statement I alone are not sufficient to answer the question.
- C. If the data either in statement I alone or in statement II alone are sufficient to answer the question.
- D. If the data in both statements I and II together are necessary to answer the question.

Correct Answer:

D. If the data in both statements I and II together are necessary to answer the question.

Explanation:

We need to find the code of the '\$'.

In the above question, there are two statements which are given below :

Statement I :

'5\$#3' means 'flowers are really good'.

Statement II :

'7#35' means 'good flowers are available'.

In I and II, the common codes are '5', '#' and '3' and the common words are 'flowers', 'are' and 'good'. Thus, in I, the remaining code '\$' stands for 'really'.

Both statements are required to solve the question. Hence the correct option is "If the data in both statements I and II together are necessary to answer the question."

Seven friends, Kushi, Vishal, Mahesh, Vikash, Sharadha, Lucky and Guddu, are sitting around a circular table with their backs towards the center. Kushi is sitting to the immediate right of Vishal. Guddu and Lucky are not sitting to the immediate left or right of Vikash. Vikash is sitting third to the left of Vishal. Sharadha is sitting to the immediate right of Vikash. Who is sitting third to the right of Vishal?

A. Guddu

B. Lucky

C. Mahesh

D. Sharadha

Correct Answer:

C. Mahesh

Explanation:

Marks: +1 for correct answer, -0 for wrong answer

Examine the information given in the following paragraph and answer the items that follow:

Guest seminars on five topics viz., Physics, Geography, Computer Science, Literature, and Psychology are to be scheduled from Monday to Friday, one seminar on each day.

Conditions:

1. Geography is not scheduled on Thursday.
2. The guest speaker for Computer Science is available only on Thursday.
3. The Psychology seminar is scheduled immediately after the Geography seminar.
4. The Literature seminar is scheduled immediately before the Geography seminar.

Which seminar is scheduled immediately before the Psychology seminar?

A. Geography

B. Literature

C. Physics

D. Computer Science

Correct Answer:

A. Geography

Explanation:

Final Arrangement

Monday – Literature

Tuesday – Geography

Wednesday – Psychology

Thursday – Computer Science

Friday – Physics

As per the given condition, Psychology is scheduled immediately after Geography. Hence, Geography comes immediately before Psychology.

Ritu, Rohan, Rahul, Riya, Ruchi, Radha, and Raman are sitting in a straight line facing north direction. Only two people sit between Ruchi and Raman. Raman sits at one of the extreme ends. Riya and Ruchi are immediate neighbours. Three people sit between Riya and Raman. Riya does not sit third from the left end. Rohan sits fourth to the right of Ritu but does not sit at extreme end. Radha is not immediate neighbour of Ritu. Who among the following sits at extreme right end?

A. Radha

B. Rahul

C. Raman

D. Ritu

Correct Answer:

A. Radha

Explanation:

Marks: +1 for correct answer, -0 for wrong answer

Twelve friends are seated along the two rows – (such that facing each other). A, B, C, D, E and F seated in first row and facing south. P, Q, R, S, T and V are seated in second row and facing north. Q is on the immediate right of S who is facing A. D is on the immediate right of A. P, F and C are at extreme ends and nobody is seated on the right of F. Only V is seated between P and T and he is not facing B. Q is on the immediate left of R. Which of the following pairs is at one of the extreme ends?

A. P, B

B. C, T

C. F, T

D. R, C

Correct Answer:

D. R, C

Explanation:

Looking at the family picture, Amit said, "He is my wife's father's son's only sister's father-in-law".
How is the person in the photo related to Amit?

A. Father-in-law

B. Wife's brother

C. Father

D. Son

Correct Answer:

C. Father

Explanation:

Symbol in Diagram	Meaning
○	Female
□	Male
==	Married Couple
—	Siblings
	Difference Of Generation

From the given information following family tree are given below as –

From the above person is Amit's Father.

Thus, the correct answer is Father.

Marks: +1 for correct answer, -0 for wrong answer

In a certain code language,

$R + T$ means 'R is the sister of T'.

$R - T$ means 'R is the father of T'.

$R \times T$ means 'R is the wife of T'.

$R \div T$ means 'R is the mother of T'.

Based on the above, how is H related to E if ' $D - E \times F - G + H \div I + J$ '?

A. Wife

B. Father

C. Mother

D. Daughter

Correct Answer:

D. Daughter

Explanation:

Given:

$R + T$ means 'R is the sister of T'.

Relations	Sister	Father	Wife	Mother
Sign	+	*	X	÷

Symbol in Diagram	Meaning
• / ○	Female
+ / □	Male
==	Married Couple
—	Siblings
	Difference Of Generation

'D – E × F – G + H ÷ I + J'

From the given information family tree will be:

So, H is the daughter of E.

Thus, the correct option is: Daughter

Which of the following options will replace the question mark (?) in the given series?

150, 230, 322, 402, ?, 574

A. 488

B. 494

C. 477

D. 459

Correct Answer:

B. 494

Preplnsta
An Adda Education Company

Explanation:

Given:

150, 230, 322, 402, ?, 574

Logic: The series follows an alternating difference pattern +80, +92, +80, +92, +80.

The differences between consecutive terms:

$$230 - 150 = 80$$

$$322 - 230 = 92$$

$$402 - 322 = 80$$

$$? - 402 = 92$$

$$(402 + 92) = 494$$

$$574 - ? = 80$$

$$(574 - 494) = 80$$

So, the next term is: $402 + 92 = 494$

Thus, the correct answer is 494

Find the missing letter: B, E, I, N, T, ?

A. Z

B. A

C. Y

D. X

Correct Answer:

B. A

Explanation:

Differences in positions: B(2), E(5) +3, I(9) +4, N(14) +5, T(20) +6, Next +7 $\rightarrow 20+7=27 \rightarrow A$ (wrapping) or position $27 \bmod 26 = A(1)$.

Marks: +1 for correct answer, -0 for wrong answer

In this series, fill in the blanks: BDF, CEH, DFJ, _____, FHN

A. EGK

B. EGL

C. EIM

D. EFI

Correct Answer:

B. EGL

Explanation:

The Logic: Treat each position (1st, 2nd, and 3rd letters) as its own separate line.

1st Letters: Just the normal alphabet. B → C → D → E → F

2nd Letters: Also the normal alphabet, but starting from D. D → E → F → G → H

3rd Letters: Skip one letter every time (count by 2s). F (skip G) → H (skip I) → J (skip K) → L (skip M) → N

Final Step: Put the 4th letters together: E + G + L = EGL.

Marks: +1 for correct answer, -0 for wrong answer

Directions: A statement is given followed by two inferences I and II. You have to consider the statement to be true even if it seems to be at variance with commonly known facts. You have to decide which of the given inferences, if any, follow from the given statement.

Statement: The government has implemented strict environmental regulations on industrial emissions to reduce pollution levels in the city.

Inferences:

I. Industrial companies will need to invest in cleaner technologies to comply with the environmental regulations.

II. The air quality in the city is expected to improve as a result of the implementation of these regulations.

A. If only I follows

B. If only II follows

C. If both I and II follow

D. If neither I nor II follows

Correct Answer:

C. If both I and II follow

Explanation:

I. Industrial companies will need to invest in cleaner technologies to comply with the environmental regulations. This inference logically follows from the given statement. If the government has implemented strict environmental regulations on industrial emissions, it implies that industrial companies will be required to adopt cleaner technologies to meet the regulatory standards. Investing in cleaner technologies would enable them to reduce their emissions and ensure compliance with the regulations.

II. The air quality in the city is expected to improve as a result of the implementation of these regulations. This inference also logically follows from the given statement. The implementation of strict environmental regulations on industrial emissions is aimed at reducing pollution levels in the city. By controlling and reducing industrial emissions, the air quality in the city is expected to improve over time. The regulations are specifically designed to mitigate the negative impact of industrial activities on the environment and public health.

Based on the above analysis, both inference I and II logically follow from the given statement.

Therefore, the correct answer is If both I and II follow.

Marks: +1 for correct answer, -0 for wrong answer

In this question, two statements I and II have been given. These statements may be independent causes or effects of independent causes or a common cause. One of the statements may be the effect of the other statement. Read both statements and select the correct answer.

Statement I: The average temperature in City X has been steadily increasing over the past decade.

Statement II: The industrial activities in City X have significantly increased in the same period.

- A. I is the cause and II is its possible effect
- B. Both I and II are independent causes**
- C. II is the cause and I is its possible effect
- D. Both I and II are effects of independent causes

Correct Answer:

B. Both I and II are independent causes

Explanation:

Based on the given information, it is reasonable to conclude that both statements I and II are effects of independent causes. The increasing average temperature in City X could be attributed to various factors such as climate change, urbanization, and global warming. On the other hand, the significant increase in industrial activities might be influenced by economic growth, government policies, or market demands.

Therefore, the correct answer is Both I and II are independent causes.
