Professional Summary

Final-year B.E. Computer Science and Engineering (Artificial Intelligence & Machine Learning) student with hands-on experience in AI, Machine Learning, Java Spring Boot. Developed AI-powered applications involving OCR, NLP, Explainable AI (XAI), and REST APIs. Passionate about building scalable software solutions and continuously learning emerging technologies.

Education

Sri Krishna College of Technology

Coimbatore, Tamil Nadu

B.E. Computer Science and Engineering (Artificial Intelligence & Machine Learning)

2023 – 2027

- CGPA: 7.5 / 10

Sri Vidya Mandir Matric Hr. Sec. School

Dharmapuri, Tamil Nadu

Higher Secondary (Mathematics – Biology)

2021 – 2023

- Percentage: 88.8%

Technical Skills

Programming Languages: Java, Python, C++, SQL

AI / Machine Learning: Machine Learning, Deep Learning, Natural Language Processing (NLP), Generative AI, Explainable AI (XAI), Retrieval-Augmented Generation (RAG), Data Preprocessing, Model Evaluation

Frameworks & Libraries: Spring Boot, React.js, FastAPI, TensorFlow, Scikit-learn, OpenCV, Streamlit

Databases: MySQL

Tools: GitHub, Docker, Swagger UI, VS Code, MySQL Workbench

Cloud: AWS Cloud Practitioner

Projects

DOCMIND AI–AI Document Intelligence Platform | *Spring Boot, React.js, FastAPI, Python, MySQL, Docker* 2026

- Developed a full-stack AI document intelligence platform using Spring Boot, React.js, FastAPI, and MySQL following a layered architecture with RESTful APIs.
- Integrated OCR and NLP techniques for document text extraction, summarization, keyword extraction, and named entity recognition through a Python AI service.
- Implemented JWT authentication, Swagger API documentation, Docker-based deployment, and seamless communication between frontend, backend, and AI services.

Secure XAI-Based Decision Auditing System | *Python, YOLOv8, Streamlit, Explainable AI*

2026

- Developed a real-time autonomous driving decision auditing system integrating object detection with Explainable AI techniques.
- Built an interactive Streamlit dashboard displaying detected objects, driving decisions, confidence scores, heatmaps, and blockchain-based decision logs.
- Designed a modular architecture for perception, decision-making, explainability, and structured logging to improve transparency of AI-driven decisions.

Campus Club Management System | *Spring Boot, React.js, MySQL*

2025

- Developed a full-stack web application for managing student clubs, events, and member registrations with secure role-based authentication.
- Implemented REST APIs, CRUD operations, and MySQL database integration to streamline club administration and event management.
- Designed responsive dashboards with search, event management, and analytics features to enhance usability and user experience.

Certifications

- **AWS Certified Cloud Practitioner** — Amazon Web Services
- **Cloud Computing (NPTEL)** — Elite + Silver (12 Week Course)
- **Python Essentials 1 & 2** — Cisco Networking Academy
- **Data Structures and Algorithms using C++** — iamneo
- **Wheels on Bot** — Innovate Engineering Products

Achievements

- Built multiple AI and Full-Stack projects using Spring Boot, React.js, Python, and Machine Learning.
- Actively exploring Generative AI, Large Language Models (LLMs), and Explainable AI through hands-on projects.
